Agenda

- Why Alliance Partner?
- Strategic Alliances Sales
- ISV Integrity Program
- HP/ISVs Common Solution and Success

Why Alliance Partner?

- Alliances allow HP to thoughtfully apply R&D investments
- Extend reach across market segments, industries and regions
- Create new markets, business models and opportunities.

HP Virtualized Infrastructure Solutions for mySAP Business Suite

Die Adaptive Computing Lösung von Hewlett-Packard

CERTIFICATE OF CONFORMITY

SAP AG hereby confirms that
Hewlett Packard Company
has been approved to receive this certificate by providing an
Adaptive Computing Compliant
Concept according to the Adaptive Computing Compliance Test.
Certificate No. 2004007
The test has been performed using the following platform
and building block combination:

Computing: HP Integrity & HP 9000, HP UX 11.x
Storage: HP Storage Works
Control: SAP NetWeaver 9.0,
Adaptive Computing Controller V1.0

Waldorf, November 8, 2006

Ulf Habigt, Chief
Vice President
Adaptive Computing

University of Magdeburg

Education, Europe

Increased agility, reduced costs with HP virtualization for SAP

Challenge	Solution	Results
<ul style="list-style-type: none"> The University of Magdeburg operates an SAP University Competence Center (HCC) based on the Application Service Provider model. Large number of users – some 40,000 students – results in a high IT load. Fluctuations in demand result in huge peak loads for the IT infrastructure. 	<ul style="list-style-type: none"> HP Virtualized Infrastructure Solutions for mySAP™ Business Suite Virtualization and consolidation of HP and SAP system landscape. Control of load distribution for SAP applications by SAP Adaptive Computing Controller integrated into HP solution HP Integrity Superdome servers running HP-UX 11i v2 	<ul style="list-style-type: none"> Effective peak load management by distributing SAP applications to various servers. Virtualization ensures optimal usage of hardware, which enables consolidation of existing hardware. Consolidations helps reduce IT operating costs by some 30 to 40 percent. The HCC can continue to provide a professional, educational service at a more cost effective price and with greater agility to meet future demand.

19 6 December 2006

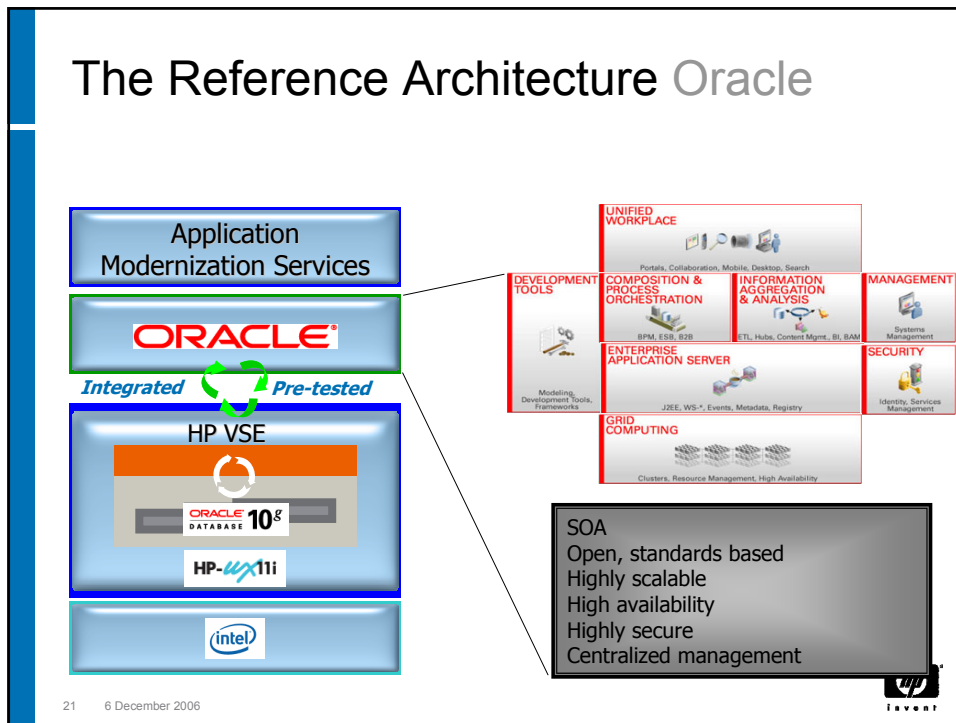

“With the HP Virtualized Infrastructure Solutions for mySAP™ Business Suite we have achieved flexibility in our IT load handling and business agility. It has also cut Total Cost of Ownership: Infrastructure and marginal costs have gone down, which will result in savings of 30 to 40 percent of operating costs.”

Prof. Claus Rautenstrauch
Faculty for Informatics
Director of the Magdeburg HCC

University

HP and Oracle Alignment Reference Architecture for 10g

ORACLE

HP Reference Architectures for Oracle are:

- Tested, proven, and supported hardware and software components
- Designed to help companies build commercial grid solutions that meet specific business and technology needs
- Designed and documented, so users can reduce the complexity, costs, and risks of deploying new technology
- Complemented by HP and Oracle consulting and support services

Application Server, Database and Operating System Software	Hardware	Management Software

Flexibility for successful EDC at Boehringer Ingelheim

"HP Services has given us unparalleled flexibility to tailor the Electronic Data Capture (EDC) solution to our specific needs. Throughout the project, HP has reacted to change and carried out improvements with astonishing speed."
Miguel Pérez Vázquez, technical project manager, Boehringer Ingelheim

Objective	Approach	Business benefits
<ul style="list-style-type: none"> Boehringer Ingelheim needed to reduce time-to-market for new medicines It decided to focus on clinical trials, which accounted for more than one third of development costs With traditional paper-based processes for recording data from clinical trials being both slow and error-prone, an alternative had to be found 	<ul style="list-style-type: none"> Boehringer Ingelheim decided to launch an Electronic Data Capture (EDC) initiative, which would enable participating hospitals to submit trial data directly over the internet The EDC solution is based on Oracle Remote Data Capture To ensure a successful implementation, Boehringer Ingelheim engaged HP to provide end-to-end infrastructure services covering planning, deployment, management 	<ul style="list-style-type: none"> The EDC solution provides an integrated paperless workflow that supports a faster flow of trial data, and enables an improvement in data quality The infrastructure and associated services from HP provide Boehringer Ingelheim with the agility to adapt quickly within the highly dynamic clinical research environment Together, these benefits contribute to faster time-to-market

HP and Oracle implement new SAP infrastructure at the GEA Group AG

"HP's support service, together with the reliability of HP technology, has contributed greatly towards the fact that we are regularly able to hit our customer service levels. The HP and Oracle solution ensures 24-hour access - a crucial factor for us, since our SAP users operate throughout the world."

Objective	Approach	Business benefits
<ul style="list-style-type: none"> Configuration of an effective and scalable infrastructure solution using latest technology for the next four years Storage and backup solution at the lowest possible cost and with the highest possible capacity High-level availability requirements Replacement of the Informix databases with a modern Unicode-capable database solution Simple migration concept for changeover to new infrastructure and database technology 	<ul style="list-style-type: none"> HP partnered with Oracle to provide the solution Three HP Integrity rx8620 servers with HP-UX 11i v2 Two HP StorageWorks XP12000 disk arrays as central storage Close collaboration of HP and Oracle, complete migration of all databases from Informix to Oracle by HP and Oracle HP OpenView and HP Serviceguard management software HP OpenView Data Protector 5.1 as backup and recovery software 	<ul style="list-style-type: none"> Effective hardware and software infrastructure for mySAP Business Suite Extremely high availability Scalable solution Automatic load distribution Fast and simple transition to latest technology

BI with Hyperion

Hyperion® System™ 9 BI+™ Analytic Services on HP Integrity Servers
 The world's most powerful, scalable, and cost-effective business intelligence analytics platform

Sell together with HP, Intel®, and Hyperion

WHAT IS THE OPPORTUNITY

Upgrading customers to the Hyperion System 9 BI+ analytics platform on HP Integrity servers. Software-plus-hardware deals valued between US\$500,000 to 1.8 million each.

HOW DO I DO THIS

Locate opportunities in your customer base that currently run a 32-bit version of Hyperion Essbase on legacy HP servers

WHY DO CUSTOMERS CARE

- Empowerment of managers throughout the company to make faster, smarter business decisions
- More detailed analysis for discovery of new sources of income and profits
- Support for regulatory compliance
- Companywide alignment of strategy and execution
- Maximized value from CRM, ERP, and data warehouse investments

Hannover Rück betreibt Global Data Warehouse mit Lösung von HP, Intel und Hyperion

hannover rück

“Es war sicherlich eine Herausforderung unser komplexes Global Data Warehouse auf HP Integrity Server mit 64-Bit Intel Itanium 2 Prozessoren zu migrieren. Aber wir haben diese Herausforderung gemeistert und profitieren jetzt von einer extrem leistungsfähigen, skalierbaren und zukunftsicheren HW”

Joachim Bayer, Leiter IT-Infrastruktur der Hannover Rück

Objective	Approach	Business benefits
<ul style="list-style-type: none"> • Migration eines Global Data Warehouse als einheitliche Daten- und Informations-Plattform für alle weltweiten Tochter- und Beteiligungsgesellschaften auf HP Integrity Servern mit Intel® Itanium® 2 Prozessoren • Hohe Anforderungen an Qualitätssicherung, Leistung und Skalierbarkeit 	<ul style="list-style-type: none"> • HP Integrity Server mit Intel® Itanium® 2 Prozessoren: • 2 rx4640 für Test-Umgebung und Preproduction • 1 rx7620 als Produktionssystem • Datenspeicherung auf HP StorageWorks Disk Array XP 512 • HP MC/ServiceGuard (Clustersoftware) • HP Workload Manager 	<ul style="list-style-type: none"> • Sehr hohe Leistung • Weltweiter Zugriff auf einheitlichen Datenbestand • Erhebliche Verkürzung der Rechen und Auswertungszeiten • Skalierbare und damit zukunftssichere Lösung
